

Parent/Guardian Notification: Use of Educational Technology

At the Calgary Board of Education, we believe that thoughtfully chosen digital tools and resources enrich teaching and learning, support student engagement, and prepare students for success in an increasingly digital world. Technology allows students to collaborate, create, and access personalized learning opportunities in ways that extend beyond the classroom.

At the same time, we recognize the importance of protecting student personal information. All digital resources used in our schools must comply with the *Protection of Privacy Act* (POPA) and Administrative Regulation 1061: Responsible Care and Security of Information. These frameworks ensure that student data is collected, stored, and used responsibly.

Before any digital tool or application is introduced, it is carefully vetted by our district to confirm:

- Its educational value for student learning.
- Its compliance with the Alberta *Protection of Privacy Act* (POPA).
- Alignment with district policies, including AR1061.

This means that families can be assured that the applications used in classrooms are appropriate for learning and meet our privacy and security standards. All schools review and post their specific Digital Citizenship plans annually on their website, developing and supporting students' digital competencies, including: being respectful, informed, involved, balanced, being responsible and safe.

Below is a list of the websites and applications that may be used in your child's classroom.

Educational Technology Tools in Use

Course/ Subject Area	Software / Application Title	Website Link	Student Information Collected	How This Supports Student Learning
Business Studies	Copyleaks - High Schools Only	https://copyleaks.com/	First name;Last name;Email address (educbe);	Academic Integrity (ie AI and Plagiarism checkers);
